**Abstract**

The aim of this paper is to compare the role of globalization (overall and its three dimensions of economic, social, as well as political integrations) in order to promote economic growth when the role of a political party is taken into account in 10 former communist countries (FCC) and 18 OECD democracies in Central-Western Europe. Employing the panel cointegration tests, as a first step we proceed to an analytical framework to investigate the long-run relationships among globalization, political party, and real GDP per capita. For a second step we estimate the long-run effect of globalization on economic growth done country-by-country and group-based via the panel dynamic ordinary least squares and fully modified ordinary least square. The results of our empirical test confirm our expectations that globalization contributes to economic growth, but it is also sensitive to specific institutional factors like an incumbent party. Globalization has a larger impact on real GDP per capita in FCC countries than in their OECD countries. While the geography position is quite close, the margin of their development is very large for these two groups of countries.

**Keywords:** Globalization; Economic growth; Institutions; Political party; Europe.

Subject: Re: revised version to Eastern European Economics

I have had some difficulty processing your paper due to a virus on my computer. However, I do thank you for shortening the paper to 25 pages. To move it to publication:

1. Prepare the paper, and files of the paper according to the attached instructions.
3. Send the files to Ms Soled at [dsoled.mesharpe@gmail.com](mailto:dsoled.mesharpe@gmail.com)
4. Sign and send the attached copyright form to  
Debra Soled  
M.E. Sharpe Publisher  
80 Business Park Drive  
Armonk, NY 10504 USA

For inquiries about the publication of your article, please contact Ms Soled at Debra Soled <[dsoled@mesharpe.com](mailto:dsoled@mesharpe.com)>

Thank you very much for your support of Eastern European Economics.

Sincerely,  
Josef C. Brada
